

REMARKS

This paper is a supplement to Amendment A, filed on April 2, 2007 in response to the Office Action mailed October 31, 2007. The claims have been further amended to more clearly describe the present invention, and are submitted to be in allowable form. No new matter has been added to the application.

Claim 1 has been amended by removing redundant language.

Claim 4 has been amended to more clearly define a watch, and is respectfully submitted to be in allowable form.

Claim 5 has also been further amended to more clearly define a watch, and recites, among other things, that a portion of the metal exterior parts has one electrical resistance value, and another portion of the parts has a different electrical resistance value. This feature is not disclosed or suggested by the cited reference, and the reference is not directed to watches. Applicant submits that as amended, Independent claim 5 is allowable over Paratte. Withdrawal is requested.

Several claims have been amended to describe an “outer case” instead of a “body (side) member” for clarity.

For the foregoing reasons, applicants believe that this case is in condition for allowance, which is respectfully requested. The examiner should call applicants' attorney if an interview would expedite prosecution.

Respectfully submitted,

GREER, BURNS & CRAIN, LTD.
